

Press Release

## **Linearity GmbH: Seed financing round for vector graphic design software Vectornator Pro closed.**

Hilden, March 23, 2018 - The startup company Linearity GmbH, founded early 2017, develops the graphic design software Vectornator Pro and was now able to close a 7-digit seed financing round from angel investors lead by Martin Sinner, Philip Magoulas and Christian Siemoneit.

The investment will be used for the development of new features that will make ones drawing experience unforgettable and invested into marketing to build up a larger customer base. Vladimir Danila and Marc Zacherl who have founded the company: “We are very proud of the support from experienced venture capital investors, business angels and entrepreneurs. On our way to improve Vectornator Pro and become the No. 1 graphic design software, their diverse experience will help us to advance quickly. We are looking forward to exciting months ahead.”

### **About Vectornator Pro**

Vectornator Pro is a vector graphic design software available for iOS that allows everyone to create sensational graphics from anywhere, whether you're in a café, in a park, on the train or at home. Vectornator Pro offers a rock-solid set of tools for professionals, while at the same time being approachable for amateurs – a fantastic all-around package for everyone. After a long product development phase, the software was finally released at the end of May 2017.
